

ECO-WEAVED GRATE RANGE

BIKE SAFE

Fully compliant to AS3996 - 2006 bicycle tyre penetration resistance (BTPR) requirements, the Eco-Weaved sump grate range is ideal for areas anticipated to experience both vehicle and bicycle traffic.

BOLT DOWN

Utilising strong M12 bolts, the Eco-Weaved sump grate range is bolted down, standard. In addition to preventing tampering, the bolt down system prevents rocking and dislodgement, fully securing the grate to the ground.

HEAVY DUTY

All Eco-Weaved grates are manufactured to heavy duty (Class D) of AS3996 requirements. The load-sharing weaved design, coupled with high strength steel, facilitates a highly efficient distribution of load.
